DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance: The invention relates to a method and apparatus producing a plastic product having a microstructured outer surface using a molding arrangement having at least mold parts moveable towards and away from each other and a predetermined volume of viscous polymerizable plastic material being supplied to a cavity formed between the mold parts after which polymerization of the plastic material occurs and following polymerization of the plastic material the mold parts are caused to move apart from each other to permit removal of the finished plastic product, the outer shape of the plastic product conforms to the inner shape of the mold cavity produced by the mold parts characterized in that the viscous polymerizable plastic material is supplied to the cavity around a hole pertaining to the finished plastic product wherein the viscous plastic material is distributed in a direction from the hole towards the peripheral edge area of the plastic product being produced. The plastic material being supplied around the centrally placed hole which

spreads in a radial direction is essential in the production of a symmetrical disc which is provided by the method and apparatus as claimed. The method and apparatus as claimed has not been taught nor fairly suggested either singularly or in combination by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Asai teaches an apparatus for making molded discs but does not teach the step of introducing the plastic material around a centrally placed hole that spreads in a radial direction as claimed.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Lechert Jr. whose telephone number is 571-272-1203. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni can be reached on 571-272-1196. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
